## PROFILE

Hello, my nickname is Tera. I am a Fullstack Developer and System Analyst. As a Fullstack Developer, I handle the Frontend (development of the appearance and user interaction of web applications) and also the Backend (providing the data needed by the application). As a System Analyst, I handle the design of applications starting from needs analysis, interface design, creating flowcharts, making use case diagrams, and ERD creation. In my daily life, the technologies I use to help my work include Laravel, Codeigniter, NuxtJs, VueJs, NextJs, ReactJs, Golang, PHP.

## WORK EXPERIENCE

### System Analyst

PT Gamatechno Indonesia 2022-Now

- Analysis of client needs.
- Prepare system solution proposals according to client needs.
- Conduct product presentations and solution proposals.
- Supervise, document and evaluate the progress of the project.
